Acoustic Piano

Model & Pricing Guide

This guide contains price information for nearly every brand, model, style, and finish of new piano that has regular distribution in the United States and, for the most part, Canada. Omitted are some marginal, local, or “stencil” brands (brands sold only by a single dealership). Prices are in U.S. dollars and are subject to change. Prices include an allowance for the approximate cost of freight from the U.S. warehouse to the dealer, and for a minimal amount of make-ready by the dealer. The prices cited in this edition were compiled in August 2021 and apply only to piano sales in the U.S. Prices in Canada are often very different due to differences in duty, freight, sales practices, and competition.

Note that the prices of European pianos vary with the value of the dollar against the euro. For this edition, the exchange rate used by most manufacturers was approximately €1 = \$1.20. Prices of European pianos include import duties and estimated costs of airfreight (where applicable) to the dealer. However, actual costs will vary depending on the shipping method used, the port of entry, and other variables. Also keep in mind that the dealer may have purchased the piano at an exchange rate different from the current one.

Unless otherwise indicated, cabinet styles are assumed to be traditional in nature, with minimal embellishment and straight legs. Recognizable furniture styles are noted, and the manufacturer’s own trademarked style name is used when an appropriate generic name could not be determined. Please see the section on “Furniture Style and Finish” in our online article “**Piano-Buying Basics**” for descriptions or definitions of terms relating to style and finish.

“Size” refers to the height of a vertical or the length of a grand. These are the only dimensions that vary significantly and relate to the quality of the instrument. The height of a vertical piano is measured from the floor to the top of the piano. The length of a grand piano is measured from the very front (keyboard end) to the very back (tail end) with the lid closed.

About Prices

The subject of piano pricing is difficult, complicated, and controversial. One of the major problems is that piano dealers tend to prefer that list prices be as high as possible so they can still make a profit while appearing to give very generous discounts. Honesty about pricing is resisted.

But even knowing what is “honest” is a slippery business because many factors can have a dramatic effect on piano pricing. For one thing, different dealerships can pay very different wholesale prices for the same merchandise, depending on:

- the size of the dealership and how many pianos it agrees to purchase at one time or over a period of time
- whether the dealer pays cash or finances the purchase
- the degree to which the dealer buys manufacturer overstocks at bargain prices
- any special terms the dealership negotiates with the manufacturer or distributor
- the cost of freight to the dealer's location.

In addition to these variations at the wholesale level, retail conditions also vary from dealer to dealer or from one geographic area to another, including:

- the general cost of doing business in the dealer's area
- the level of pre- and post-sale service the dealer provides
- the level of professionalism of the sales staff and the degree to which they are trained and compensated
- the ease of local comparison shopping by the consumer for a particular type of piano or at a particular price level.

Besides the variations between dealerships, the circumstances of each sale at any particular dealership can vary tremendously due to such things as:

- how long a particular piano has been sitting around unsold, racking up finance charges for the dealer
- the dealer's financial condition and need for cash at the moment
- competing sales events going on at other dealerships in the area
- whether or not the customer is trading in a used piano.

As difficult as it might be to come up with accurate price information, confusion and ignorance about pricing for such a high-ticket item is intolerable to the consumer, and can cause decision-making paralysis. I strongly believe that a reasonable amount of price information actually greases the wheels of commerce by giving the customer the peace of mind that allows him or her to make a purchase. In this guide I've tried to give a level of information about price that reasonably respects the interests of both buyer and seller, given the range of prices that can exist for any particular model.

Prices include a bench except where noted. (Even where a price doesn't include a bench, the dealer will almost always provide one and quote a price that includes it.) Most dealers will also include delivery and one or two tunings in the home, but these are optional and a matter of agreement between you and the dealer. Prices do not include sales tax.

In this guide, two prices are given for each model: Manufacturer's Suggested Retail Price (MSRP) and Suggested Maximum Price (SMP).

Manufacturer's Suggested Retail Price (MSRP)

The MSRP is a price provided by the manufacturer or distributor and designed as a starting point from which dealers are expected to discount. I include it here for

reference purposes—only rarely does a customer pay this price. The MSRP is usually figured as a multiple of the wholesale price, but the specific multiple used differs from company to company. **For that reason, it's fruitless to compare prices of different brands by comparing discounts from the MSRP.** To see why, consider the following scenario:

Manufacturer A sells brand A through its dealer A. The wholesale price to the dealer is \$1,000, but for the purpose of setting the MSRP, the manufacturer doubles the wholesale price and sets the MSRP at \$2,000. Dealer A offers a 25 percent discount off the MSRP, for a “street price” of \$1,500.

Manufacturer B sells brand B through its dealer B. The wholesale price to the dealer is also \$1,000, but manufacturer B triples the wholesale price and sets the MSRP at \$3,000. Dealer B offers a generous 50 percent discount, for a street price of, again, \$1,500.

Although the street price is the same for both pianos, a customer shopping at both stores and knowing nothing about the wholesale price or how the MSRPs are computed, is likely to come away with the impression that brand B, with a discount of 50 percent off \$3,000, is a more “valuable” piano and a better deal than brand A, with a discount of 25 percent off \$2,000. Other factors aside, which dealer do you think will get the sale? It's important to note that there is nothing about brand B that makes it deserving of a higher MSRP than brand A—how to compute the MSRP is essentially a marketing decision on the part of the manufacturer.

Because of the deceptive manner in which MSRPs are so often used, some manufacturers no longer provide them. In those cases, I've left the MSRP column blank.

Suggested Maximum Price (SMP)

The Suggested Maximum Price (SMP) is a price I've created, based on a profit margin that I've uniformly applied to published wholesale prices. (Where the published wholesale price is unavailable, or is believed to be bogus, as is sometimes the case, I've made a reasonable attempt to estimate the SMP from other sources.) Because in the SMP, unlike in the MSRP, the same profit margin is applied to all brands, the SMP can be used as a “benchmark” price for the purpose of comparing brands and offers. The specific profit margin I've chosen for the SMP is one that dealers often try—but rarely manage—to attain. Also included in the SMP, in most cases, are allowances for duty (where applicable), freight charges, and a minimal amount of make-ready by the dealer. Although the SMP is my creation, it's a reasonable estimate of the **maximum** price you should realistically expect to pay. However, **most sales actually take place at a modest discount to the SMP.** How good a deal you can negotiate will vary, depending on the many factors listed earlier.

Note: You have probably read in the news about the shipping delays that are plaguing the world economy as it struggles to bounce back from the COVID pandemic. Accompanying these delays are enormous increases in the cost of international shipping—sometimes by as much as 600%. Some piano manufacturers have adjusted their published prices to account for these increases. Most, however, are simply tacking a freight surcharge on to their wholesale prices, which retailers will

have to pass on to their customers to remain profitable. Therefore, you should expect a surcharge of perhaps \$500 to \$750 above the prices shown in this book. The surcharges will likely be withdrawn once shipping capacity returns to pre-COVID levels and freight prices return to normal.

There is no single “fair” or “right” price that can be applied to every purchase. The only fair price is that which the buyer and seller agree on. It’s understandable that you would like to pay as little as possible, but remember that piano shopping is not just about chasing the lowest price. Be sure you are getting the instrument that best suits your needs and preferences, and that the dealer is committed to providing the appropriate level of pre- and post-sale service.

For more information about shopping for a new piano and how to save money, please see pages 60–75 in *The Piano Book, Fourth Edition*.

STEINWAY & SONS

These are the prices at the Steinway retail store in New York City, often used as a benchmark for Steinway prices throughout the country. Model K-52 in ebony and grand models in ebony, mahogany, and walnut include adjustable artist benches. Other models include regular wood bench. Wood-veneered models are in a semigloss finish called "satin lustre."

Steinway (Hamburg) Grands

I frequently get requests for prices of pianos made in Steinway's branch factory in Hamburg, Germany. Officially, these pianos are not sold in North America, but it is possible to order one through an American Steinway dealer, or to go to Europe and purchase one there. The following list shows approximately how much it would cost to purchase a Hamburg Steinway in Europe and have it shipped to the United States. The list was derived by taking the published retail price in Europe, subtracting the value-added tax not applicable to foreign purchasers, converting to U.S. dollars (the rate used here is 1 Euro = \$1.20, but is obviously subject to change), and adding approximate charges for duty, air freight, crating, insurance, brokerage fees, and delivery. Only prices for grands in polished ebony are shown here. Caution: This list is published for general informational purposes only. The price that Steinway would charge for a piano ordered through an American Steinway dealer may be different. (Also, the cost of a trip to Europe to purchase the piano is not included.)

Digital Piano

Specifications & Prices

In the specification chart for each brand of digital piano, we have included those features and specifications about which buyers, in our experience, are most likely to be curious. However, many models have more features than are shown. See the various articles on digital pianos on our website for more information about each of the terms defined below, shown in the order in which they appear in the charts.

Form The physical form of the model: G=Grand, V= Vertical (Console), S=Slab.

Ensemble A digital piano with easy-play and auto-accompaniments (not just rhythms).

Finish The wood finishes or colors available for a particular model (not always specified for slab models). Multiple finish options are separated by a slash (/). A manufacturer's own color term is used where a generic term could not be determined. See the box below for finish codes.

FINISH CODES	
A	Ash
AG	Amber Glow
AI	Alder
BI	Blue
Bk	Black
C	Cherry
DB	Deep Brunette
E	Ebony
G	Gold
Iv	Ivory
L	Lacquer (used with a wood or color designation)
M	Mahogany
MD	Mahogany Decor
O	Oak
Or	Orange
P	Polished (used with a wood or color designation)
Pk	Pink
R	Rosewood
Rd	Red
S	Satin (used with a wood or color designation)
Sr	Silver
VR	Velvette Rouge
W	Walnut
WG	Wood Grain (wood type not specified)
Wt	White

Estimated Price This is our estimate of the price you will pay for the instrument. For digitals sold online or through chain and warehouse outlets, this price is the Minimum Advertised Price (MAP) and is shown in italics. For digitals sold only through bricks-and-mortar piano dealers, the price shown is based on a profit margin that piano dealers typically aspire to when selling digitals, including an allowance for incoming freight and setup. Discounts from this price, if any, typically are small. For more information on MAP and other pricing issues, please read "Buying a Digital Piano," on www.pianobuyer.com.

MSRP Manufacturer's Suggested Retail Price, also known as "list" or "sticker" price. Not all manufacturers use them.

Sound Source Indicates whether the sound source is Sampling (S) or Physical Modeling (M).

Voices The number of different musical voices the user can select from the instrument panel, plus (if applicable) the number of General MIDI (GM) or XG voices that are not user-selectable but are available for playback of MIDI files.

Key Release Indicates the presence of samples or simulation of Key Off sounds—acoustic piano keys and dampers returning to rest position and cutting off the sounds of vibrating strings.

Sustain Resonance Indicates the presence of samples or simulation of the sound with the sustain pedal depressed (allowing the strings to vibrate sympathetically).

String Resonance Indicates the presence of samples or simulation of String Resonance—the resonance sound of the strings of non-played notes.

Rhythms/Styles The number of rhythms in a standard digital, or the number of auto-accompaniment styles available in an ensemble digital.

Polyphony The maximum number of sounds the instrument can produce simultaneously. UL=Unlimited

Total Watts Total combined amplifier power.

Speakers The number of individual speakers.

Piano Pedals The number of piano pedals supplied with the model. A number in parentheses indicates the availability of an optional pedal unit with additional pedals.

Half Pedal Indicates that the model supports half-pedaling.

Action Indicates the type of action used, if specified.

Triple-Sensor Keys Indicates the presence of three key sensors, instead of the usual two, for greater touch realism.

Escapement Indicates the presence of an acoustic piano action's escapement feel.

Wood Keys Indicates actions with wooden keys.

Ivory Texture Indicates actions with ivory-textured keytops.

Bluetooth Indicates that the instrument is equipped with Bluetooth for connecting to the Internet.

Vocal Support The model supports some level of vocal performance. This support can vary from the piano simply having a microphone input, to its having the ability to produce the vocalist's voice in multi-part harmony, to pitch-correct the notes sung by the vocalist, or to alter the original voice.

Educational Features The model includes features that specifically support the learning experience. Note that while the ability to record and play back is an important learning tool, it is present on almost all models and so is not included in this definition.

External Storage Indicates the type of external memory storage accessible, such as USB or SanDisk.

USB to Computer Indicates the model's ability to interface with a Mac or PC via USB cable.

USB Digital Audio Indicates the ability to record and play back digital audio via a USB flash drive.

Recording Tracks The number of internal recordable tracks for recording of MIDI files.

Warranty (Parts/Labor) Indicates the manufacturer's warranty coverage period: the first number is the length of the parts coverage; the second number is the length of the labor coverage.

Dimensions Width, Depth, and Height are rounded to the nearest inch.

Weight Weight of the model rounded to the nearest pound.

The **PIANO BOOK** for the 21st century

The Best of Acoustic & Digital Piano Buyer is a collection of the most useful articles we've published in the past nine years on buying a new, used, or restored piano or digital piano.

“A highly informative and practical resource for anyone interested in the world of pianos.”

—Brian Chung, Senior Vice President, Shigeru Kawai Piano Company

More than 30 articles on:

- Buying a New Piano
- Buying a Used or Restored Piano
- Buying a High-End Piano
- Buying Pianos for an Institution or Concert Hall
- Caring for a Piano
- Restoring, Selling, or Donating a Piano
- Buying an Electronic Player-Piano System
- Buying a Digital Piano
- Hybrid and Software Pianos
- Piano Benches, Lamps, and Accessories
- Piano Moving
- How to Acoustically Optimize a Room for a Piano

Plus—Descriptions of More Than 80 Brands of Acoustic, Digital, and Electronic Player Piano

WWW.PIANOBUYER.COM

**Fall 2021 Model & Price Supplement to
ACOUSTIC & DIGITAL PIANO BUYER**

www.pianobuyer.com

A piano is one of the most expensive consumer purchases many people will ever make. Yet when you shop for a new piano, you'll find that honest and unbiased price information is mysteriously scarce. This Model & Price Supplement to *Acoustic & Digital Piano Buyer* fills that gap by supplying "list prices" for most piano brands and models, plus advice on how to estimate actual "street prices." It also contains prices and specifications for most brands and models of digital piano.

If you are in the market for a new piano or digital piano, this Supplement will pay for itself many times over through greater peace of mind and convenience while shopping, and can potentially save you money on your purchase. If you are a professional in the piano industry, this Supplement will serve as a handy reference on the sales floor or on a service call.

For the most up-to-date price information, and for articles, searchable databases, classified ads, and other piano-shopping tools, see our website at **www.pianobuyer.com**.

Larry Fine, Editor, is author of *The Piano Book: Buying & Owning a New or Used Piano*, and Editor of *Acoustic & Digital Piano Buyer*. A Registered Piano Technician member of the Piano Technicians Guild, Fine has been involved in the piano industry for over 40 years.
